

RYETEC PHT (POWER HARROW TOOLBAR)

ADJUSTABLE LOW DISTURBANCE TOOLBAR

The Ryetec PHT has been designed for use as a close coupled toolbar for cultivation and drilling equipment to remove any compaction caused by previous operations prior to new crop establishment in a single pass.

Causing minimal surface ground disturbance with a large 500mm cutting disc and through the frame PTO facility allow for the mounting of PTO driven power harrows and combinations, relieving compaction and aiding drainage.

Available with either full Auto Reset or Shearbar system

Standard Specification:

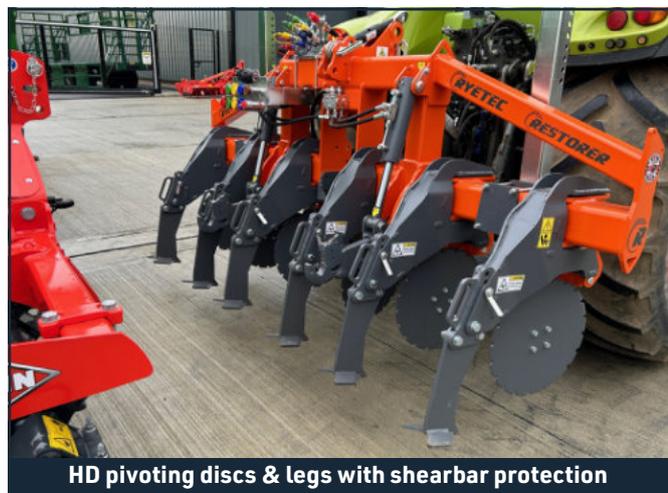

- » **3m/4m/5m/6m toolbar with legs & points with tungsten tips @ 500mm spacing** - longer lasting points for reduced running costs & downtime.
- » **15mm Hardox legs that are depth adjustable to 300mm** - for high resistance to damage and wear with accurate and easy no tool depth adjustment.
- » **Shearbar protection for legs** - where conditions are unlikely to cause repeated obstruction of the legs (Auto reset option available).
- » **Heavy duty pivoting discs & legs** - allow for ease of maneuverability around obstacles, headland following and steering pressure from tracked or pivot steer tractors.
- » **Close coupled reach adjustable (680mm +) rear linkage** - Heavy duty with hydraulic raise and lower to attach rear mounted implements, minimising rear overhang.
- » **Through the frame PTO** - ability for single shaft through frame or intermediate lay shaft and two PTO shafts to drive power harrows etc.
- » **Umbilical transfer system** - to convey hydraulic and electrical services to rear mounted implements.

Options:

- » **Optional Seeding Equipment** - ability to drill OSR & cover crops.
- » **Rear packer roller (flat or ribbed)** - for stand alone operation.
- » **Alternative legs & points** - customers preferred legs/points can be fitted.
- » **Auto Reset** - where conditions will cause repeated interference with legs.
- » **PTO layshaft & alternative drive shafts.**
