

## Peruzzo Motofrog 75

### The Peruzzo Motofrog 75

The Peruzzo Motofrog 75 is a professional self propelled flail mower with a 75cm wide cut and available on tracks or wheels. The machine can deal with heavy vegetation in hard to reach places as the whole unit is only 90cm wide. With 4 forward gears and 2 reverse the machine is easy to manoeuvre and has suitable cutting speed for various densities of material. Height adjustable front caster wheels allow for a maximum cutting height of 8cm down to a minimum of 2cm. Various flails options available for different applications, as standard the Motofrog comes with heavy duty cast 'delta flails' (image overleaf).

**Overall Dimensions: 1.8m x 0.90m x 1.25m**

### Standard Features:

- 75cm Wide Cut.
- 20 heavy duty cast 'delta' flails as standard.
- Height adjustable caster wheels.
- Powered by a 13.5hp Briggs & Stratton Engine
- Self propelled on tracks or wheels with 4 forward and 2 reverse gears.
- 3 flail options available.
- Adjustable handles pivoting both up and down and side to side.
- Locking front caster wheels (from the handles) for maximum stability on sloped ground.

MP75W	13.5	20	40	20	75	Briggs & Stratton Petrol	195	Self Propelled Wheels
MP75T	13.5	20	40	20	75	Briggs & Stratton Petrol	270	Self Propelled Tracks

## Peruzzo Motofrog 75

Available on tracks, wheels or dual wheels (option)

Adjustable front caster wheels to vary the cutting height from 2cm—8cm. These are also lockable from the handles which allows for great stability when mowing on slopes etc but increased manoeuvrability when turning.

Adjustable handles both up and down and then pivoting side to side allow comfortable operation for any user even on sloped ground.

Y Flails best for general cutting with a good mulching affect.

Scarifying flails

Delta flail option best for heavy duty material and a finer finish.
